/***** Certifications *****/

AWS: Associate (Solution Architect, Developer, SysOps) Scrum..: Certified Scrum (Master, Developer)
Professional (Solution Architect, DevOps Engineer) CompTIA: Infrastructure (Network+, Linux+, Cloud+)
Specialty (Security, Advanced Networking) Cyber Sec. (Security+, CySA+, PenTest+, CASP+)

/***** Technologies *****/

Adobe....: Photoshop, Lightroom, Illustrator, Fresco AWS.....: Serverless, Containers, Data Analytics
Client...: HTML5, CSS3, JavaScript, TypeScript, Next Security..: IAM, SCP, KMS, JWT, VPN, WAF, SIEM, IPsec
Server...: Node, Bash, Groovy, Java, Python, Ruby, PHP Networking: Route53, VPC, Routing table, CIDR, NACL, SG
Database.: Aurora, Dynamo, Redis, Mongo, Neo4j, Keyspaces Monitoring: SNS, PagerDuty, Datadog, ELK, RUM, APM, XRay
Analytics: Kinesis, MQ, EMR, Redshift, Athena, Data Lakes Automation: CloudFormation, Jenkins, Docker, Hashicorp

/***** Recent Experience *****/

#!/usr/bin/env technologist

- > Contributed and analyzed 400+ JavaScript solutions on neetcode.io as a reliable resource for programmers
- > Built and secured a distributed multi-cloud & hybrid network with 15 segmentations and 30 components
- > Configured HomeLab monitoring to collect real-time network data and generate comprehensive dashboards
- > Maintained a tech blog on dev.to, covering a wide range of cloud, network, security, and software topics

#!/usr/bin/env architect

- > Designed a custom CI/CD Jenkins library tailored to the requirements of Monorepos with 100% code coverage
- > Identified performance bottlenecks and increased web throughput by 70% with a compressed cache solution
- > Implemented Highly Available failover mechanisms to ensure uninterrupted service in the event of failures
- > Open-sourced an AWS cloud optimization tool to improve cost efficiency, performance, and resource utilization

#!/usr/bin/env leadership

- > Led efforts to automate, gather, and display team metrics, to support data-driven decision-making
- > Conducted fire drills to identify gaps in runbooks and improve team production incident response
- > Monitored progress and milestones of the roadmap, to deliver strategic work and adjust priorities
- > Socialized RFCs to stakeholders, teams, or relevant forums to gather feedback and refine requirements

#!/usr/bin/env collaborator

- > Hosted scrum workshops to teach work breakdown, story slicing, story mapping, mob programming, and TDD
- > Facilitated team pairing sessions to foster knowledge sharing, collaboration, and skill development
- > Translated technical concepts into engaging demos, ensuring features/benefits to various stakeholders
- > Participated in cross-functional meetings and working groups to promote cross-organization alignment
