/***** Certifications *****/

AWS: Associate (Solution Architect, Developer, SysOps) Scrum: Certified Scrum (Master, Developer)
Professional (Solution Architect, DevOps Engineer)

/***** Technologies *****/

Adobe....: Photoshop, Lightroom, Illustrator, Fresco	AWS.....: Serverless, Containers, Data Analytics
Client...: HTML5, CSS3, JavaScript, TypeScript, Next	Security..: IAM, SCP, KMS, JWT, VPN, WAF, Detection
Server...: Node, Bash, Groovy, Java, Python, Ruby, PHP	Networking: Route53, RouteTables, VPC, CIDR, ACL, SG
Database.: Aurora, Dynamo, Redis, Mongo, Neo4j, Keyspaces	Monitoring: SNS, PagerDuty, Datadog, ELK, RUM, APM, XRay
Analytics: Kinesis, MQ, EMR, Redshift, Athena, Data Lakes	Automation: CloudFormation, Jenkins, Docker, Hashicorp

/***** Education *****/

[09:14-05:17] MS Information Technology@Virginia Tech:~/Blacksburg/VA ./gpa 3.97
[09:11-05:14] BS Information Technology@George Mason:~/Fairfax/VA ./gpa 3.32

/***** Experience *****/

[09:21-Today] Lead Software Engineer@Disney Streaming:~/New York/NY

- > Lowered the number of daily deployments by 66% from creating a monorepo pipeline.
- > Simplified the complexity of our web proxies by templating 50+ environments down to 2.
- > Generated multiple Cloud Formation Templates to automate the process of building web cloud infrastructure.
- > Created a shareable Jenkins library with multiple pipelines that can build, test, publish, deploy projects.

[11:19-09:21] Senior Software Engineer@Disney Streaming:~/New York/NY

- > Re-architected Disney+ web multi-region to become highly available and resilient.
- > Reformed my team's agile processes by improving team cohesion and requirement gathering.
- > Increased the web throughput performance of Disney+ by ~70% with a compressed caching solution.
- > Classified cost optimizations of +\$100,000 in idle cloud resources by building an automated cloud advisor.

[01:18-10:19] Senior Full-Stack Software Engineer@Capital One:~/McLean/VA

- > Involved in multiple inner source efforts while mentoring junior developers.
- > Advanced developer tool kits to automate serverless architecture applications.
- > Reduced cost by ~\$2,000 a month by modernizing web applications to using serverless technologies.
- > Updated the marketing decision engine by automating the business process with big data streaming technologies.

[11:16-01:18] Full-Stack Software Engineer@Capital One:~/McLean/VA

- > Contributed and influenced the Capital One Nodejs enterprise framework.
- > Presented various knowledge sharing topics at internal networking events.
- > Improved end-user experience by building interactive navigating UI widgets.
- > Upgraded an application's cloud architecture to enable CICD and be security compliant.

[01:16-11:16] Software Engineer II@Booz Allen Hamilton:~/McLean/VA

- > Overhauled an enterprise software's dependencies mapping and testing suite.
- > Designed an automation tool that interrogated, vetted, and updated data through a job scheduler.
- > Integrated a tracking analytics tool across multiple applications to identify actionable insights.
- > Diminished memory complexity issues from $O(n^2)$ to $O(1)$ by writing a scalable re-indexing streaming solution.

[08:14-01:16] Software Engineer I@Booz Allen Hamilton:~/McLean/VA

- > Worked as a full-stack in an agile and test-driven environment developing intelligence platforms.
- > Cultivated tools to allow analysts access to near real-time threat intelligence and write reports.
- > Assisted in rapid prototyping, hosted presentations, gathered requirements, and implemented features.
- > Revamped a security platform's API by patching vulnerabilities and enabling encryption in flight and at rest.
